

## Physical Body Review and Mental Body Questions to Ask the CCC By Suzy Miller

Please do not compare your responses to the ones I received. I'm providing these simply to create more curiosity and give you more questions to take back to the children. There are so many different angles to these questions and your responses will and should be through your unique lens.

**Q1)** What is the one dietary change or requirement that

benefits most energetically sensitive children?

**Response:** Many children have told me that it makes all the difference in the world when food is prepared with love and/or is blessed. Because these children feel their way through life, the intention with which something is created makes a significant difference in how they receive, process, or digest it.

**Q2)** Generally speaking, how do vaccines impact the systems of energetically sensitive children?

**Response:** It's challenging enough that the content of vaccines is highly toxic, but the children have often said that it is the intention behind the vaccines that is questionable. Any toxic substance has a tendency to create chaos in the systems of energetically sensitive children.

**Q3)** What is the most supportive means of enhancing communication with non-verbal children?

**Response:** Before any attempt to support verbal communication is offered, the children always ask that we first notice their current means of interacting. All children are communicating. There are many ways to communicate that do not require speaking.

**Q4)** Why do children diagnosed with autism insist on sleeping with their parents?

**Response:** I've often heard that energetically sensitive children sleep with their parents because it's easier for them to exchange information with them in their sleep state. I've also had children share that they like to notice how their parents exit and enter the body in the process of falling asleep and waking. Each sleep cycle is a mini integration in its own right.

**Q5)** Why do children on the spectrum typically lack physical coordination?

**Response:** Mainly because they are not integrated into the lower chakras, therefore they have no real awareness of their legs and their connection to the earth!

### **REMEMBER:**

As before, remember to:

1. Practice and connect in the Name of the I AM Presence That You Are.
2. Connect to the CCC and write down the information you receive.
3. If you are confused or uncertain about the responses you receive, go back and ask the CCC.
4. Bring your questions and experiences to the FB group.

### **HELPFUL HINT**

Sometimes it is helpful to ask the question and then go do something else. Much like trying to watch a kettle get to boil, the CCC will find it easier to drop answers into your awareness when you're not trying so hard to receive them.

## **ADDITIONAL PRACTICE**

Again, please make sure that any comments, questions or experiences that you bring, to the FB group regarding individual children that you connect to maintains confidentiality for the parent and the child!

## **MENTAL BODY QUESTIONS TO ASK THE CCC**

1. 1) Generally speaking, what is the best educational setting for children with energetic sensitivities?
2. 2) What causes children diagnosed with autism to have limited communication?
3. 3) Why don't children diagnosed with autism follow directions?
4. 4) Do we unconsciously influence what a child communicates through facilitated communication, and if so, how?
5. 5) Why are these children frequently better at certain subjects, such as math, than others?

Enjoy your connection
